NOTE: All dimensions in millimetres. Where possible slow the scanner down and enable soft-scan mode as long-term use of carriers may cause increased scanner wear.

### Material

High-quality acrylic document carriers offering better performance and more scanning options than previous polyester products. Short side bonded hinge

### More features

Available with a choice of a white or black backing sheet in two different sizes suitable for regular paper sizes (see table)

### Packaging

Shipped 5 (five) rolled in a single cardboard box with label. All prices per box.

### More possibilities

Scan many small objects normally placed on a flatbed in one operation.

### Thicker than other brands

Heavier gauge than many other types these professional quality carriers keep on protecting your artwork and your scanner for much longer.

### Easy to use

Open carrier. Place objects to be scanned inside then feed into the scanner bonded edge first then scan.
